Buddhist Buildings The Architecture Of

Buddhist religious architecture developed in the Indian subcontinent. Three types of structures are associated with the religious architecture of early Buddhism: monasteries, places to venerate relics, and shrines or prayer halls, which later came to be called temples in some places. The initial function of a stupa was the veneration and safe-guarding of the relics of Gautama Buddha. The earliest surviving example of a stupa is in Sanchi. In accordance with changes in religious practice, stupas
